WATER METER INSTALLATION

Effective immediately all water meters shall be installed to the following specifications:

- I. A Ball valve shall be installed immediately after the entry of the water service pipe into the building.
- II. Where Water Pressure within a building exceeds 80 psi static, an approved water-pressure reducing valve conforming to ASSE 1003 with strainer shall be installed to reduce the pressure in the building water distribution piping to 80 psi static or less.
- III. Where Water Pressure within a building is less than 40 psi static, an approved Water Pressure Booster System must be installed to maintain a minimum of 40 psi static, but not to exceed 80 psi static.
- IV. Appropriate meter supplied by The Town of Wallkill shall be installed. Meter **must** be purchased from The Town of Wallkill Water Department.
- V. A double check valve (watts No. 7 or equal) must be installed downstream from meter.
- VI. Services over 1" will be installed with the proper backflow prevention device as per Town Code section 242-10.
- VII. A pressure relief valve set at 150 pounds must be installed downstream from check valve.
- VIII. Install expansion absorber (Amtrol ST-5, ST-12 or equal) downstream from relief valve.
- IX. Install Ball valve equal to the size of the service line downstream from expansion tank.

Please give this sheet to the plumber.
